

# You are A Masterpiece

The East Valley Pro-Life Alliance was in the West Valley to start the Year 2016 with presentations of "You Are A Masterpiece" and "In the Beginning". Young girls ages 10-12 participated in a workshop that began with a flannel board story of Creation. Several girls assisted in helping with the hands-on activities that included modeling with clay, coloring, and creating ice-cream sundaes. A fun raffle after the presentation of "You Are A Masterpiece" revealed that all forty-two girls were paying attention and so lots of prizes were given out. The glow-in-the-dark stars and planets and art sets were the favorites. But what really captured their attention was the fact that a twelve week fetus has a beating heart and is fully formed.

**Many of the girls had stories to share:**

*"My mom had twins and they were born premature and were really little but now they are just right."*

*"My older sister is special needs and my parents were told to get rid of her when she was in my mom's womb, but I am glad they didn't listen because she is fun and she is my best friend."*

Many of the adults, including some grandparents, after the viewing, shyly admitted that they also learned a few things about the development of a baby in the womb.

A home schooling Co-Op was treated to a complimentary copy of "You are a Masterpiece" for their Biology class and for several weeks were able to view and study our display of the 9 month Life Cycle Fetal Models
